

Note: This is a graded quiz and counts towards course completion.

Question 4

1 / 1 pts

In 5S, "Sustain" means:

- ☐ raise batch quantity
- ☐ cut inspection cost
- ☒ maintain the stabilized workplace
- ☐ reduce machine speed

That's correct!

Question 5

1 / 1 pts

Stability forms the foundation of the House of Lean.

- ☐ Only for logistics
- ☐ False
- ☐ Only for services
- ☒ True

That's correct!

Question 6

1 / 1 pts

In 5S, "Shine" refers to:

- ☒ clean and inspect the area
- ☐ classify by value
- ☐ employee rotation
- ☐ stop the assembly line

That's correct!

Question 7

1 / 1 pts

The main goal of the House of Lean includes:

- ☐ fastest setup, largest batch, highest buffer
- ☒ highest quality, lowest cost, shortest lead time
- ☐ highest inventory, lowest output, longest lead time
- ☐ maximum labor, minimum automation, fixed demand

That's correct!

Question 8

1 / 1 pts

Lean production emphasises the idea of:

- ☐ large inventories
- ☐ isolated workstations
- ☒ continuous improvement
- ☐ mass buffering

That's correct!

Question 9

1 / 1 pts

Jidoka in the House of Lean stresses the need to:

☐ increase batch size

☒ stop and notify abnormalities

☐ reduce takt time

☐ centralize all decisions

That's correct!

Question 10

1 / 1 pts

The final step in the Kaizen cycle is to:

☐ measure results

☐ create solutions

☒ standardize the solution

☐ inspect raw materials

That's correct!

Question 11

1 / 1 pts

Which of the following is listed as part of JIT practice?

☐ large queue sizes

☐ excess safety stock

☒ multi-skilled labourers

☐ isolated departments

That's correct!

Question 12

1 / 1 pts

Kanban is primarily a:

☒ scheduling system

☐ quality award

☐ cost accounting method

☐ forecasting model

That's correct!

Question 13

1 / 1 pts

Heijunka is associated with:

☐ quality auditing

☒ production levelling

☐ error proofing

☐ worker rotation

That's correct!

Question 14

1 / 1 pts

Poka-yoke is best understood as:

☒ mistake-proofing

☐ line balancing

☐ capacity cushioning

☐ demand smoothing

That's correct!

Question 15

1 / 1 pts

Kanban signals that the downstream workstation is ready for the upstream workstation to:

- ☐ increase inventory levels
- ☒ produce another batch
- ☐ inspect finished goods
- ☐ stop production permanently

That's correct!

Question 16

1 / 1 pts

In 5S, "Sort" means:

- ☐ group items by cost
- ☐ schedule preventive maintenance
- ☐ label all machines
- ☒ eliminate what is not needed

That's correct!

Question 17

1 / 1 pts

In lean production, Kanban-based control supports:

- ☒ pull production
- ☐ preventive maintenance
- ☐ push production
- ☐ batch inspection

That's correct!

Question 18

1 / 1 pts

Just-in-Time is defined as a philosophy based on the planned elimination of waste and:

- ☒ continuous improvement of productivity
- ☐ large-scale automation
- ☐ fixed scheduling rules
- ☐ supplier expansion

That's correct!

Question 19

1 / 1 pts

JIT covers manufacturing activities from design engineering to:

- ☐ depreciation
- ☐ recruitment
- ☐ product withdrawal
- ☒ delivery

That's correct!

Question 20

1 / 1 pts

After creating solutions in the Kaizen cycle, the next step is to:

- ☒ test the solutions
- ☐ document waste
- ☐ identify problems
- ☐ estimate demand

That's correct!

Quiz Score: 20 out of 20
